EDUCATION

DUKE UNIVERSITY, THE FUQUA SCHOOL OF BUSINESS

Durham, NC

MS in Quantitative Management: Business Analytics, Strategy

May 2026

Relevant Coursework: Modern Analytics (Python), Data Infrastructure (SQL), Data Visualization (Tableau), Data Science for Business (R), Decision Analytics & Modeling (Excel), Empirical Economics, Strategic Management

MANIPAL INSTITUTE OF TECHNOLOGY, MAHE

Manipal, India

B.Tech in Electronic and Communications Engineering, Minor in Business Management

July 2024

WORK EXPERIENCE

GENUINE PARTS COMPANY (NAPA)

Durham, North Carolina

Student Consultant – Capstone Project

March 2026 - May 2026

- Led a 5-person consulting team to analyze **customer purchasing behavior** and develop data-driven pricing recommendations for NAPA's pricing leadership, translating customer analytics into strategies for targeted retention and price optimization.
- Built **RFM segmentation** and **churn propensity models** to identify high-value and at-risk accounts; translated findings into a tiered pricing and customer engagement playbook and presented actionable insights to NAPA executives.

LAVELLE NETWORKS PVT LTD

Bengaluru, India

Business Analyst

July 2024 - June 2025

- Proactively identified operational inefficiencies and modernized reporting workflows using **Python** (data processing, automation), **SQL** (aggregation), and **Excel** (stakeholder dashboards); improving data quality and enabling faster stakeholder decision-making.
- Built and maintained an executive-facing forecasting dashboard flagging at-risk renewal accounts monthly using **Advanced Excel**; provided leadership with forward-looking risk intelligence enabling proactive outreach and **\$1.4M** in recurring revenue.
- Developed statistical revenue forecasting models achieving **90% accuracy** on monthly revenue; partnered with sales, finance, and ops to deliver leadership-ready forecasts enabling optimized inventory positioning and reducing fulfillment delays.
- Proactively redesigned divisional performance reporting cadence from monthly to weekly, presenting data-driven insights via live **Power BI** dashboards and executive presentations; enabling faster strategic course correction at senior levels.
- Redesigned the client hardware replacement workflow from a manual process to a proactive, data-governed operating model by deploying a low-code automation solution on **Zoho Creator**, using usage-trend analytics to drive replacement decisions.

SENSORISE DIGITAL SOLUTIONS PVT LTD

Gurugram, India

Business Analyst Intern

January 2024 - June 2024

- Led the 'KYC SenseTouch' platform redesign, migrating the backend from Java to Python/Django; eliminated recurring stability issues and enabled integration with the company's **Python-based AI and analytics stack**.
- Delivered comprehensive **cross-sector market analysis** across 5+ verticals, synthesizing competitive intelligence and growth trends to directly inform the company's portfolio expansion strategy into new markets.

ARCADIS-IBI GROUP

Gurugram, India

ICT Intern

July 2023 - August 2023

- Evaluated smart city technical trends for DMIC-IITGNL, optimizing proposal acceptance and reducing development lead times.
- Synthesized technical concepts into executive presentations, improving stakeholder approval speed by **15%**.

GRANT THORNTON BHARAT LLP

Gurugram, India

Public Sector Consultant Summer Trainee

June 2023 - July 2023

- Consolidated data from **20+** disparate sources and delivered strategic market research reports to state leadership, directly informing policy decisions and demonstrating the ability to synthesize complex information for executive stakeholders.
- Assisted state leadership in designing comprehensive **cybersecurity frameworks** for state-level initiatives, translating national security standards into actionable governance structures and driving organizational compliance.

SELECTED PROJECTS

Market/Competitive Segmentation (SQL). Consolidated customer and market data to segment accounts by industry, size, and profitability; identified high-growth segments and underserved markets, informing strategic expansion priorities and GTM strategy.

Agentic Workflow for Contract Renewal Automation (LangGraph, Claude API, Python). Designed and built a multi-agent MVP that autonomously processes contracts, extracts renewal terms, scores account churn risk, and drafts stakeholder outreach, demonstrating zero-based redesign of a manual enterprise workflow into an AI-native operating model.

Public Safety Demand Analysis (Tableau, Python, R). Analyzed police, fire, construction and traffic data for the city of Cary using Python for data cleaning, R for statistical analysis, and Tableau for visualization, identifying geographic crime concentration and seasonal crash risk patterns to guide district-level resource allocation.

Classifying Real vs. AI-Generated Images (Python, PyTorch). Built a custom CNN and fine-tuned ResNet-18 in PyTorch to classify 57K images; achieved 99.9% train accuracy with a GPU-optimized preprocessing pipeline.

TECHNICAL SKILLS

Languages: Python (PySpark, NumPy, Pandas), R, SQL; **Visualization:** Tableau, Power BI, ggplot2, matplotlib, Advanced Excel (functions, lookup, pivot tables); **Machine Learning:** Regression (Linear, Logistic, Lasso), SVM, K-means, Decision Trees, CNNs; **Tools/Frameworks:** ETL, VS Code, PCA, Hypothesis testing, A/B testing, Time-Series Forecasting, Relational Data Modeling;
